

HR ANALYTICS DASHBOARD

Here are detailed insights derived from the **HR Analytics Dashboard**: Here are detailed insights derived from the **HR Analytics Dashboard**:

1. Overview of HR Metrics

- **Total Employees:** 1,470
- **Attrition Count:** 237
- **Attrition Rate:** 16%
- **Active Employees:** 1,233
- **Average Employee Age:** 37 years

Insight:

The organization has a **moderate attrition rate (16%)**, which means that employee turnover is a concern but not excessively high. With an average age of **37 years**, the workforce consists of **mid-career professionals**, indicating a need for retention strategies focused on experienced employees.

2. Department-Wise Attrition Analysis

- **Sales Department:** 133 employees (56.12%) attrition.
- **HR Department:** 92 employees (38.82%) attrition.
- **R&D Department:** 12 employees (5.06%) attrition.

Insight:

- **Sales department has the highest attrition rate (56.12%)**, which could be due to performance-based targets, pressure, or job dissatisfaction.
- **HR department also experiences significant attrition (38.82%)**, possibly due to burnout or internal job shifts.
- **R&D department has the lowest attrition (5.06%)**, suggesting job stability and specialized skill retention.

Recommendation:

- The **Sales department** may need better **compensation structures, incentives, or work-life balance** improvements.
- The **HR department** may benefit from **internal restructuring and employee engagement initiatives**.

3. Attrition by Gender

- **Female Attrition: 87 employees**
- **Male Attrition: 150 employees**

Insight:

- Male employees have a **higher attrition count**, possibly due to job-switching opportunities, career growth stagnation, or job dissatisfaction.
- **Female attrition is lower**, which may indicate better work-life balance policies or fewer external job opportunities in certain fields.

4. Attrition by Age Group

- **Under 25: 38 employees (7.59%)**
- **25-34: 112 employees (29.11%)** (Highest attrition group)
- **35-44: 51 employees (15.61%)**
- **45-54: 25 employees (6.75%)**
- **Over 55: 11 employees (1.27%)** (Lowest attrition)

Insight:

- **The highest attrition is in the 25-34 age group (29.11%)**, likely due to early-career professionals exploring better opportunities.
- **Attrition declines significantly after age 35**, suggesting that employees who stay beyond this point are more likely to remain long-term.

- **Very low attrition in employees over 55, indicating job stability and retirement planning.**

Recommendation:

- **Retention strategies should focus on the 25-34 age group**, such as career development, promotions, and mentorship programs.
- **Providing long-term incentives for young employees** could reduce turnover.

5. Employee Distribution by Age Group

- Highest number of employees falls in the **30-36 age range**, with a peak at **35 years (155 employees)**.
- Employee count declines significantly beyond **45 years**.

Insight:

- The workforce is primarily **young-to-mid-career professionals**, reinforcing the need for career growth opportunities to reduce attrition.

6. Education Field-Wise Attrition

- **Life Sciences: 89 employees**
- **Medical: 63 employees**
- **Marketing: 35 employees**
- **Technical Degree: 32 employees**
- **Other Fields: 11 employees**
- **Human Resources: 7 employees**

Insight:

- **Life Sciences and Medical fields have the highest attrition**, possibly due to competitive industry demand.
- **HR has the lowest attrition**, indicating stability in this function.

7. Job Satisfaction Ratings Across Roles

- **Research Scientists and Research Directors have the highest satisfaction ratings (3 & 4)**
- **Sales Executives have a mixed satisfaction level but a significant number of employees with lower ratings**

- **Laboratory Technicians and Manufacturing Directors fall in the mid-range for satisfaction**

Insight:

- **Research roles** tend to have higher job satisfaction, possibly due to stable work environments.
- **Sales Executives show mixed job satisfaction, aligning with their high attrition rate.**

Recommendation:

- Sales roles should be reviewed for **workload balance, compensation structure, and training programs** to improve retention.

Key Achievements

- Conducted a **comprehensive HR Analytics study** using **Tableau** to assess **attrition trends, job satisfaction, and workforce demographics**.
- Identified **high-risk attrition segments** based on **department, age, and gender**, leading to targeted retention strategies.
- Analyzed **job satisfaction metrics by role**, providing insights into employee engagement and improvement areas.
- Provided **data-driven recommendations** to enhance **employee retention and satisfaction** in **high-turnover departments**.
